

# Maryland's Coastal Program

## A Decade of Public Access Projects

Under section 306A of the Coastal Zone Management Act, the Coastal Resource Improvement Program, funding is available for projects designed to provide or improve public access to the coast. The Maryland Coastal Zone Management Program (MCZMP) has used this funding to improve existing coastal access sites through trail improvements, boardwalk and pier construction, and improving site facilities. In addition to site improvements, CZMP has used the funding to facilitate property acquisitions for coastal access sites.
